Exh.7A Exh.7B

The exciting new Pac-Man game appeared in October 1980. This game utilizes a hide and seek format with the Pac-Man able to evade or destroy the ghosts while devouring point accumulating energy dots. The game utilizes a wrap-around feature which permits the Pac-Man to escape to the third dimension and unexpectedly reappear, an evasive action that advanced players quickly learn to employ.

Pac-Man, together with the other games currently in production—Rally-X and Gorf—have achieved the distinction of being ranked in the industry's top weekly earners, a testimonial to the excellence of Bally's products and proof of Midway's claim—"Video is our game."

The record sales of flipper type pinball games achieved in 1979 were eclipsed by the trend to the currently higher earning video games. While the flipper type pinball market was down in 1980. Bally's * sales of \$92.6 million reconfirms its position as "Number One" in the pinball segment of the amusement game industry.

In 1977, Bally was the first major manufacturer to intro-

rmc oprocessor controlled solid-state pinball games. These games, which include self-diagnostic systems and complex electronic scoring features, also employ faster action and greater player participation. Industry surveys clearly indicate that Bally designs and builds pinball games of the highest degree of product integrity.

Bally has pioneered several other important new developments in flipper type pinball games.

Such innovative features include a multi-level playfield, an infinity light backbox, and the use of strobe lights Bally's Xenon pinball is the first in the industry to use a female synthesized human voice which exhorts the player to "Try Xenon again." Bally's electronic sound effects are among the most advanced in the industry and contribute greatly to increased player involvement. In an effort to offer different designs to different market segments, Bally continues to sell a Super Sized playfield that appeals to certain locations.

Employing the largest art department in the industry, the graphics on Bally pinball games unquestionably have set the standard of the industry, giving each game a unique identity.

Bally products are marketed through an extensive network of worldwide distributors, both independent and Company owned, totalling approximately 110 locations. These distribution channels provide ready access to all segments of the amusement game market and assure that Bally products are supported by excellent maintenance and repair capabilities. In addition, Bally conducts seminars for distributors throughout the United States and overseas to inform distributor personnel of the latest developments in maintenance, business trends and products.

Bally is the leader in the coin-operated amusement game industry, in part because of its strong vertical integration. The company has in-house capabilities for virtually every aspect of the design, manufacture, distribution and operation of coin-operated amusement games. Bally can thus monitor closely and react quickly to rapidly changing market conditions.

DANIEL YIH-PIN PERNG states:

- 1. He resides as 887 Jason Court, Bridgewater, New Jersey.
- 2. He has obtained a PhD degree in Applied Mathematics from Harvard University in March of 1971.
 - 3. He has taught college-level courses at New York University.
 - 4. In his job experience, he has done research using computer software programming for over 10 years, for the following companies: TRW; Flow Research, Inc.; Xerox; and Exxon.
 - 5. He owns and is employed by Allied Enterprises, a company that uses computer software programming.
 - 6. He has compared the programs of the programmed PROM memory chips from the Artic Speed-up Kit and from Midway's PROM memory chips, part numbers 9316B-4M20, 9316B-4M21, 9316B-4M22, 9316B-4M23, and 9316B-4M24, and found that the two programs are different. The two programs will produce two different results.
 - 7. That if called to testify as a witness at the trial of this matter, he could competently testify to the matters stated herein.

State of New Jersey SS. County of Somerset

DANIEL YIH-PIN PERNG states:

- 1. He resides at 887 Jason Court, Bridgewater, New Jersey.
- 2. He has obtained a PhD degree in Applied Mathematics from Harvard University in March of 1971.
 - He has taught college-level courses at New York University.
 - 4. In his job experience, he has done research using computer software programming for over 10 years, for the following companies: TRW, Flow Research, Inc., Xerox, and Exxon.
 - 5. He owns and is employed by Allied Enterprises, a company that uses computer software programming.
 - 6. He received from Mr. Shih-Ming Huang an Artic Speed-up Kit, which is a memory board with programmed PROM memory chips. He used his computer to obtain a printout of the PROM program contained in the chips. The print-out of the PROM program of the Artic Speed-up Kit is attached.
 - 7. That if called to testify as a witness at the trial of this matter. he could competently testify to the matters stated herein.

In I Will for the first

Subscribed and sworn to before me, a Notary Public, on the 2nd day of January 1981. Morary Public
